SKILLS

Programming Languages	Python, JavaScript, HTML, CSS, SQL
Frameworks	Django, React
Databases	MySQL, SQLite
API Development	DRF API
Other Skills	Data Scraping

Work Experience

Back-End Developer (Remote)

JS Technologies — March 2024 to March 2025

- Completed 1 year of remote experience in back-end development using Python, Django, SQLite, and Django REST Framework (DRF).
- Developed and maintained scalable APIs and server-side logic for various real-world projects.
- Managed databases, handled data modeling, and ensured secure and efficient CRUD operations.
- Collaborated with front-end teams to integrate APIs and optimize performance across the application.

PROJECTS

POS Point of Sale System	<i>Tech Stack: Python, Django, HTML, CSS, BOOTSTRAP, jQuery</i>
- Designed and developed a scalable POS system with key modules for sales, purchases, inventory, and transactions. - Implemented role-based access control and company-wise data isolation. - Added features for real-time stock updates, invoice generation, and product return processing. - Built payment and subscription management with email/audit logs for tracking user activity.	
Attendance Management System	<i>Tech Stack: Django, Python, HTML, Bootstrap</i>
- Built a role-based attendance management system using Django with a custom user model for students and teachers. - Implemented secure authentication, profile management, and department-based user segmentation. - Developed features such as file uploads, keyword-based search, and user-specific dashboards. - Designed a responsive frontend using HTML and Bootstrap, ensuring smooth user experience across devices.	
Intellesense Chatbot (FYP)	<i>Tech Stack: Django, OpenAI, JWT, LlamaIndex, REST API, React.js</i>
- Developed an AI-powered university query chatbot using Django, OpenAI GPT models, and LlamaIndex for vector-based semantic search. - Implemented JWT-secured authentication and real-time chat history management with a scalable RESTful API architecture for frontend-backend integration using React.js. - Integrated asynchronous query handling, response caching, and dynamic analytics dashboards to ensure optimized performance and scalability. - Designed an email notification system for both users and admins to enhance communication and engagement.	
<i>*others include: Xclusive Labels (Shipping System), Human Resource Management System (HRM).</i>	

Education

Bachelor's of Sciences in Computer Science (BSCS)	December 2021 - July 2025
